

Hohenstein

Toy Testing

Objective

To ensure that children can play riskless Hohenstein tests toys at the highest level. Whether it is teddy bears, puzzle mats or building blocks – our experts carry out independent and objective tests according to different legal regulations for safety. By having your toys tested, you create confidence and meet consumers' demand for safe and high-quality toys.

Toys on the testing bench

Based on your aims we offer single parameter testing or a full service package of tests for your products. Thereby, we test for:

- Mechanical and physical properties (EN 71-1)
- Flammability (EN 71-2)
- Migration of certain elements (EN 71-3)
- Organic chemical compounds (EN 71-9/-10/-11)
- N-nitrosamines and N-nitrosatable substances (EN 71-12)
- And parallel applicable regulations

Product examples

Here you will find a selection of products that our experts test:

- Textile toys: plush toys, dolls, costumes, accessories
- Wooden toys, construction toys (nonelectrical)
- Textile toys with battery
- Toys intended for children under 36 months

Our promise

- Best testing quality and expertise
- Customised services
- Provide assistance in development of high-quality and safe toys

Material quantity

- approx. 8 samples per ready-to-sale article (depending on product)
- incl. draft of packaging, safety and warning notes, labelling and if applicable further accompanying documentation
