

Testing and certifying innovative technologies

Objective:

Testing and assessing innovative technologies for the laundry industry neutrally and thereby providing support for introduction to the market.

Certification is suitable for:

- Commercial laundry and textile cleaning processes
- Commercial laundry and textile cleaning machinery
- Materials that may be processed in commercial laundries

Description:

The Hohenstein Institute certifies technical features or innovations to textile care equipment and processes in commercial laundries and textile cleaning as well as materials for commercial treatment. The focus here is on a better process result and in particular on improved economic use of resources (esp. in relation to present state of the art).

Advantages for you as the customer:

- Neutral assessment of technology
- Support for sales / marketing

Labels and certificates:

Hohenstein's "Innovative Technology" certificate

What is required of the innovation:

General:

- Proven new technical feature
- New technology
- Reduced use of resources (water, power, detergent, time)

Sustainability:

- Positive overall analysis

Duration of testing:

- The testing scenarios are arranged individually.
- The test results are analysed on the basis of Hohenstein's specialists' decades of experience in their respective fields.
